

MyTasks

☒ Do This
By Sept 23, 2021

Opens "Edit Task"

Activity, very similar to "New Task" — just pre-populated with the existing task.

My Task Keeper, v1

- A simple app that allows one to view tasks to do, create a new task, and edit an existing task.
- At this point, we are focused primarily on building the basic interaction flow.
 - In the future, we will persist the data and improve on the UI design.

← Title/short desc is required. Nothing else is.

← Text entry for lots of detail.

← You can hard code some tags/categories if you'd like.

- This should be a drop down/multiple select.

← If this checkbox is checked, allow this date/time entry to be enabled.

date/time picker

- Launches Activity to create new task.
- When new task is created, display in MyTask list.

Check this box to mark task "done".
- have display look different, but don't remove from screen.
